Your Guide To Our Services

The logo for Deerfield Behavioral Health features the word "deerfield" in a lowercase, green, sans-serif font. Above the letters "e" and "e" are two curved green lines that resemble a stylized deer's antlers. Below "deerfield" is the phrase "behavioral health" in a smaller, lowercase, green, sans-serif font.

The logo for Deerfield Centers for Addictions Treatment features the word "deerfield" in a lowercase, green, sans-serif font. Above the letters "e" and "e" are two curved green lines that resemble a stylized deer's antlers. Below "deerfield" is the phrase "centers for addictions treatment" in a smaller, lowercase, green, sans-serif font.

Assessments

An evaluation is scheduled to determine the appropriate level of care for each client. Assessments are provided for children and adults.

Therapy

A process focused on helping you heal, grow and learn more constructive ways to deal with problems or issues in your life. Therapy can also be a supportive process when going through a difficult period in your life. These challenging times can come when you're under increased stress, such as starting a new career and going through a divorce or loss.

Additionally, therapy can be used to help individuals, couples and/or families through difficult times, or to support changes needed in relationships.

Outpatient Services

Individuals will meet with one of our addictions counselors for one-on-one sessions, typically on a weekly basis. Outpatient sessions may be supplemented with one of our specialized groups as well.

Intensive Outpatient Program (IOP)

IOP is a structured group experience for individuals requiring a higher level of care. This program meets three (3) days per week, up to nine & 1/2 hours, with evening sessions to accommodate work schedules.

Medication Management

Services are offered to individuals who experience difficulty progressing in their recovery due to inconsistent adherence to their medication regime. Nurses and technicians work with individuals and their prescribers to support self-management of their medications.

Tele-psychiatry

Deerfield Behavioral Health offers tele-psychiatric services throughout Pennsylvania. Our board-certified psychiatrists and CRNPs provide psychiatric consultations with assessments, medication management, treatment planning and care coordination via video or tele-conferencing.

*If you or a loved one struggle from
mental health challenges,
don't suffer in silence.

Deerfield Centers for Drug & Alcohol Treatment (DCAT)

Deerfield Centers for Addiction Treatment (DCAT) is a licensed outpatient treatment program dedicated to helping people suffering from substance abuse problems. Patients are treated with respect, have their confidentiality maintained and are provided a safe place to begin their recovery. We use an abstinence-based model for long-term health and recovery.

Addiction clinicians complete an assessment that allows for a personalized and comprehensive treatment approach. They also work with patients to develop flexible treatment plans, integrating both professional care and self-help approaches. We understand individuals vary widely in terms of motivation for treatment and lifestyle changes. We meet regularly with each patient, monitor progress, coordinate care and assist with discharge planning and after care needs.
