AN AFFILIATE OF JOURNEY HEALTH SYSTEM

Deerfield Behavioral Health Services

Deerfield Behavioral Health, an affiliate of Journey Health System, provides positive changes in children’s and adults’ lives. We offer a unique blend of diagnostic, therapeutic, and contract behavioral health services at several locations across Pennsylvania.

Deerfield employs a full-spectrum of clinical experts including Psychiatrists, Certified Registered Nurse Practitioners (CRNPs), Physician Assistants, Licensed Clinical Social Workers, Licensed Professional Counselors, and support staff.

Therapy

Our process focuses on helping individuals, couples, and families heal, grow, and learn more constructive ways to deal with problems or issues in life. Therapy can also be a supportive process while going through a difficult period in your life when you’re under increased stress.

Tele-psychiatry

Deerfield Behavioral Health offers tele-psychiatric services throughout Pennsylvania. Our board-certified psychiatrists and CRNPs provide psychiatric consultations with assessments, medication management, treatment planning and care coordination via video or tele-conferencing.

Psychiatric Contracting Services

Deerfield has the unique and vital role of recruiting, negotiating, managing, and contracting its pool of Deerfield advanced professionals, creating a career pipeline for Journey Health System and the region.

University of Pittsburgh, Pittsburgh, PA

Deerfield Centers for Drug & Alcohol Treatment (DCAT)

Deerfield Centers for Addiction Treatment (DCAT) is a licensed outpatient treatment program dedicated to helping people suffering from substance abuse problems. Patients are treated with respect, have their confidentiality maintained and are provided a safe place to begin their recovery. We use an abstinence-based model for long-term health and recovery.

Addiction clinicians complete an assessment that allows for a personalized and comprehensive treatment approach. They also work with patients to develop flexible treatment plans, integrating both professional care and self-help approaches. We understand individuals vary widely in terms of motivation for treatment and lifestyle changes. We meet regularly with each patient, monitor progress, coordinate care and assist with discharge planning and after care needs.

Assessments

An evaluation is scheduled to determine the appropriate level of care for each client. Assessments are provided for children and adults. We also offer nurse assessments and health care linkage.

Outpatient Services

Individuals will meet with one of our addictions counselors for one-on-one sessions, typically on a weekly basis. Outpatient sessions may be supplemented with one of our specialized groups as well.

Intensive Outpatient Services (IOP)

IOP is a structured group experience for individuals requiring a higher level of care. This program meets three (3) days per week, up to nine & 1/2 hours, with evening sessions to accommodate work schedules.

Medication Assisted Treatment (MAT)

Services are offered to individuals who experience difficulty progressing in their recovery due to inconsistent adherence to their medication regime. Nurses and technicians work with individuals and their prescribers to support self-management of their medications.

Certified Recovery Services (CRS)

This service allows you to work with a certified peer specialist to further assist and support your personal recovery from drugs and alcohol. The CRS can also educate you about community resources, recovery and planning, community activities and life skills.

Support Groups

We offer the following meetings:

- >Duluth Domestic Violence Education Group
- >Early Recovery Group (meets Tuesdays 1-2 pm)
- >Wellness Group (meets Wednesdays 10-11 am)

If you or a loved one struggle from mental health or drug and alcohol challenges, don’t suffer in silence. Contact us today and start working on your path to recovery.
